Take-Off Hold Light (THL)

General

CEDD® is a smart, safe and sustainable airfield ground lighting technology. Energy and data transport are combined in a single cable. CEDD® airfield lights receive their power and data by means of induction and can therefore easily and safely be installed or replaced without making electrical contact.

With up to 40% lower energy consumption compared to regular LED AGL systems, CEDD® enables airfields to reduce their impact on the environment. Also, the robust design of the infrastructure is highly suitable for floating 'Follow-the-Greens'. CEDD® AGL provides a solution to face the most challenging future operational demands.

Most of the TKH Airport Solutions inset fixtures are available for regular 6.6-A LED AGL as well as for CEDD® AGL installations. This datasheet covers the specifications of the Take-Off Hold Light (THL).

Key Features

- 8" outer diameter
- Dust and water resistance: IP68
- Useful lamp life (LED) up to 50,000 hours
- Certification: ICAO/EASA
- Power consumption (CEDD® regulated): R: 11 W
- Ambient temperature: -40 °C (-40 °F) / + 75 °C (+167 °F)
- Internal serial interface for diagnostics and parameterization
- Integrated single lamp control
- Intensity control: 0-100%
- Optional sapphire-coated prism

Photometric data in this datasheet (such as light distributions and chromaticities) is based on ICAO certification. FAA data, if applicable, is available upon request. Contact our sales team for more information.

Company profile:

TKH Airport Solutions is an innovator in airfield ground lighting, offering a complete range of LED AGL products. We build upon the know-how from a long and successful tradition of pioneering developments in the AGL and connectivity industry. Being part of the TKH Group, our company can build on a history of more than 90 years in smart connectivity, energy distribution and AGL.
